

MOL Red LEAK Marker

lubricant dye

MOL Red LEAK Marker is a red coloured dye stock solution produced from highly refined mineral oil and an oil-soluble dye. The recommended concentration of MOL Red LEAK Marker for the application is 1 % of the actual oil fill, i.e. one litre marker solution for each 100 litre oil.

Application

Detection of leaks in hydraulic and circulation systems
For industrial use

Features and benefits

Ready solvency | Easy handling

Properties

Properties	Typical values
Appearance	dark red, bright, clear
Density at 15°C [g/cm ³]	0,870
Kinematic viscosity at 40°C [mm ² /s]	32
Pour point [°C]	-12
Flash point (Cleveland) [°C]	210

The characteristics in table are typical values of the product and do not constitute a specification.

Storage and handling instructions

Store in the original container in dry, properly ventilated area.
Keep away from direct flame and other sources of ignition.
Protect from direct sunlight.
